

Net Insurance Premium income up 22.4%

- Pre-tax profit of Euro 7.9 million (+9.7% compared to 30 June 2021) and normalised net profit of Euro 6 million
 - Combined Ratio (net of Reinsurance) at 69% (72% in 2021)
- Resilient capital position: Group Solvency Ratio of 171.9% (181.1% at 30 June 2021) a limited decrease of only 9.2 p.p.

Rome, 4 August 2022 – The Board of Directors of Net Insurance S.p.A., which met today under the chairpersonship of Luisa Todini, has approved the Half-Year Consolidated Financial Statements at 30 June 2022, subject to a limited audit by KPMG S.p.A.

In the first half of the year, **gross written premiums** of the Net Insurance Group amounted to **Euro 96.9 million**, an increase of **22.4%** compared to the same figure in the previous year.

Bancassurance significantly drives growth in both non-life and life protection, with an increase of **51%** in **premium income** compared to 30 June 2021.

In the **non-life segment**, in particular, premiums amounted to **Euro 51.9 million** (**+20.5%**). The Salary-backed Loan segment increased by 5.7% (Credit Branch) and was accompanied by the growth of the "Hail" business (+24%), allocated to the Other damage to property segment, and that of Suretyship (+34.8%), the latter distributed through the Broker channel.

In the **Life segment**, premiums amounted to **Euro 44.9 million** (+24.8%); these policies, mainly the "Term Life Insurance Policy", refer Euro 33.2 million from Salary-backed loans and the remaining Euro 11.8 million from the bancassurance/broker

channels. In particular, compared to the first half of 2021, Salary-backed loans, in the Life segment, grew by 15%, while the bancassurance/broker segment grew by 62%.

The "turnover" figure is therefore **fully in line with the targets of the end of 2022**. Attached is Table 1 with a breakdown of premiums by line of insurance in the reporting period.

Net expenses from claims¹ amounted to Euro 8.1 million, slightly up on last year (Euro 7.5 million at 30 June 2021), without taking into account Hail claims.

To the figure of 8.1 million euros must therefore be added the claims attributable to the Hail risk (equal to 3.3 million euros in June 2022 compared to 3 million euros in June 2021) that bring the charges relating to claims to 11.4 million euros (EUR 10.5 million at 30 June 2021)².

Thus, overall, claims data are also **consistent with year-end targets**.

Ordinary expenses amounted to **Euro 10.6 million** (at 30 June 2021 it stood at Euro **10** million), reflect the investments made and are fully in line with the planning of the year.

As a result of the changes described above, the **gross margin** (net technical result³) was **Euro 7.4 million**, compared to Euro 6.9 million at 30 June 2021.

Consequently, in terms of **technical business performance**, the **combined ratio** ("CoR") stood at 69% net of reinsurance (72% in 2021). At 30 June 2022, the figures gross of reinsurance were 93% (in 2021 90%).

The Group's **investments** amounted to **Euro 210 million** (+ 4.3% compared to 31 december 2021). The **financial result** was **Euro 1 million** (Euro 1.8 million at 30 June 2021), which is to be considered in line with the expected year-end figure.

¹ The expense figure is that relating to claims of portfolio, as per the Company's reclassified income statement. This differs from the item "net expenses from claims" of the consolidation schemes because it does not incorporate the change in the Life reserves (amounting to 8.8 million euros in the first half of 2022 compared to 5.9 million euros at 30 June 2021), which are included for the purposes of reclassified income statement in the earned premiums. The increase in the variation of the Life reserves is linked to the growth of the single premium multiannual product portfolio anticipated.

² In any case, it is considered appropriate to note that the reinsurance structure of the business Hail, divided into quota share and stop Loss, together with a provisional recognition closely linked to the technical trend of production, ensures the Company a positive technical profitability, albeit contained.

³ The net technical result derives from the algebraic sum of premiums, charges relating to claims, commissions to distribution networks, the reinsurance technical result, operating expenses. This indicator does not include the effect of the extraordinary assignment of an irrecoverable loan portfolio arising from salary-backed loan contracts.

The Group's direct exposure in Russian or Ukrainian securities was nil, net of a bond issued by Gaz Capital S.A. amounting to just over Euro 200 thousand and appropriately written down.

Profit for the period before tax amounted to Euro **7.9** million (compared to **Euro 7.2** million at 30 June 2021).

Normalised net profit⁴ amounted to **Euro 6 million** (Euro 7.6 million in the first half of 2021), compared to the Euro 13.6 million indicated in the Plan for the full year 2022. The **tax rate** amounted to **25.4%** of the pre-tax profit for the period and increased compared to the previous half-year period, where the tax rate was almost zero affected by the recognition of deferred taxes related to the brand revaluation process.

Net profit for the period of the Group stood at Euro 5.9 million (where it was Euro 7.2 million in H1 2021).

During the period under review, the **Group's consolidated shareholders' equity** amounted to Euro 78.4 million (at 31 December 2021, shareholders' equity amounted to Euro 88.8 million), a decrease of 11.7%, solely due to the recognition of the depreciation of financial instruments in portfolio in the "Profit or losses on financial assets available-for-sale" reserve.

In terms of **solvency**, the Group's Solvency II Ratio at 30 June was **171.9%** (at the end of H1 2021 it was **181.1%**), as a result of portfolio growth and the aforementioned market tensions. Given the strong financial volatility recorded, the figure is to be considered particularly positive and in any case aligned with the forecasts of the Business Plan⁵.

In the **Salary-backed loan** segment, Net Insurance confirmed its market leadership thanks to the technical quality of its portfolio, accompanied by distinctive and differentiating ecosystem services, such as the project that saw the internalisation of the Teleunderwriting process.

The first half of 2022, there was substantial growth in the activities related to **Bancassurance** business, both in terms of premium income and in terms of multiple

⁴ The normalised profit, is, as always, net of non recurrent charges and revenues and therefore linked to events of an extraordinary nature.

⁵ The Solvency 2 Ratio indicated in the Business Plan, for year-end 2022, is estimated to be in the 175-187% area.

business initiatives, with the implementation of existing agreements and the expansion of commercial offer, increasingly wide and personalized.

The **Broker** segment remained still focused on specialties Agro and Suretyship, which are growing.

About **digital**, in terms of **product innovation**, we highlight the launch of "**Net Sure**", the digital solution for the home that offers, along with insurance coverage, innovative and easy-to-subscribe support services.

It also mentions the trend of **complaints**, a significant indicator, among others, of the level of service that the machine allows to obtain. In the reporting period, the Group's total number of complaints was only 8 (compared to 14 in the first half of 2021).

Finally, it should also be noted that on last 23 June, the Company presented to the market the **New Business Plan** for the three-year period 2022-2025, confirming its vocation for innovation and the development of the multi-specialist model.

Foreseeable Management Evolution

Over the coming months, the company will focus on grounding of the strategic goals set out in the New Business Plan 2022-2025 in all business segments.

In view of the observed dynamics and the results obtained in the half-year just ended, the performance of the 2022 financial year is fully in line with the targets.

"In extremely adverse market conditions amid geopolitical tensions, inflationary dynamics and rising rates, the company has demonstrated industrial robustness, operational agility and financial strength" stated **Andrea Battista, CEO of Net Insurance**. "The results announced today are therefore the concrete basis for achieving the targets for the financial year," Battista concluded.

Presentation of results to the financial community

The consolidated results of the Net Insurance Group at 30 June 2022 will be presented by the CEO on **5 August at 9.00 a.m. (CET)** in a dedicated call.

The presentation, which we suggest you connect to a few minutes before it begins, can be followed via the following connection details.
